

# Documentation Index

The following documents are included in the Shared Source CLI (SSCLI) 2.0 and C# 2.0 distribution.

At the root of the distribution is the [readfirst.html](#) document. This contains important and late-breaking information on the SSCLI 2.0 distribution.

## docs Directory

<a href="#">index.html</a>	This document.
<a href="#">map.html</a>	Roadmap to the SSCLI architecture.
<a href="#">glossary.html</a>	Glossary of terms used in the SSCLI documentation and source code.
<a href="#">relnotes.html</a>	Release notes with additional information on this release of SSCLI.
<a href="#">testing_overview.html</a>	Overview of the testing infrastructure in SSCLI

## buildtools Directory

<a href="#">buildtools_index.html</a>	Index for documents in the buildtools directory. Go here for a more detailed description of each file.
<a href="#">binplace.html</a>	Build output manager.
<a href="#">buildall.html</a>	Buildall build script.
<a href="#">building_sscli.html</a>	How to build the SSCLI source tree.
<a href="#">buildutility.html</a>	The SSCLI build utility.
<a href="#">env.html</a>	Setting up the SSCLI build environment.
<a href="#">internalresgen.html</a>	A bootstrap resource compiler.
<a href="#">nmake.html</a>	Make tool.
<a href="#">resourcecompiler.html</a>	Platform-independent resource compiler used for SSCLI.

## compilers Directory

<a href="#">compilers_index.html</a>	Index for documents in the compilers directory.
<a href="#">csharp.html</a>	Options and changes for the SSCLI implementation of the C# compiler.
<a href="#">jsc.html</a>	Options and changes for SSCLI implementation of the JScript compiler.

## debugging Directory

<a href="#">debugging_index.html</a>	Index for documents in the debugging directory.
<a href="#">debugging_overview.html</a>	Overview of debugging in the SSCLI.
<a href="#">sos.html</a>	Describes the functionality of the SOS debugger extension.

ecma Directory

<a href="#">ecma_index.html</a>	Contains information about the ECMA-334 and ECMA-335 documentation.
---------------------------------	---

techinfo Directory

<a href="#">techinfo_index.html</a>	Index to the techinfo documentation directory.
<a href="#">encodings.html</a>	Encodings used in the SSCLI.
<a href="#">logging.html</a>	How to activate logging in the SSCLI.
<a href="#">native_managed_interop.html</a>	Native to managed interoperability in the SSCLI implementation.
<a href="#">pal_guide.html</a>	Platform Adaptation Layer (PAL) specification.
<a href="#">resfilefmt.html</a>	Managed CLI resource file format.
<a href="#">stackframe.html</a>	Stack frame format used in the SSCLI.

tools Directory

<a href="#">tools_index.html</a>	Index for documents in the tools directory.
<a href="#">al.html</a>	Assembly Linker tool.
<a href="#">caspol.html</a>	Code Access Security Policy tool.
<a href="#">clix.html</a>	Rotor managed application launcher tool.
<a href="#">cordbg.html</a>	Runtime managed code debugger.
<a href="#">gacutil.html</a>	Global Assembly Cache management tool.
<a href="#">genpalunitable.html</a>	Unicode table-building tool.
<a href="#">ilasm.html</a>	CIL Assembler.
<a href="#">ildasm.html</a>	CIL Disassembler.
<a href="#">ildbconv.html</a>	Symbolic debug information converting tool.
<a href="#">ildbdump.html</a>	Allows dumping of symbolic debug information stored in .ildb files.
<a href="#">metainfo.html</a>	Metadata dump tool.
<a href="#">permview.html</a>	Permissions View tool
<a href="#">peverify.html</a>	Type safety verification PEVerify tool.
<a href="#">resgen.html</a>	Resource File Generator.
<a href="#">sn.html</a>	Strong Name tool.
<a href="#">storeadm.html</a>	Isolated Storage tool.

samples Directory

<a href="#">samples_index.html</a>	Index for documents in the samples directory.
------------------------------------	---

compilers Directory

<a href="#">\clisp\clisp.html</a>	Lisp compiler sample.
<a href="#">\myc\myc.html</a>	Simple C compiler sample.

hello and helloxml Directories

<a href="#">\hello\hello.html</a>	Simple hello world sample.
<a href="#">\helloxml\helloxml.html</a>	Simple hello world sample that writes XML.

howto Directory

<a href="#">\basedatatypes\stringformat\stringformat.html</a>	String formatting sample.
<a href="#">\codedom\listbuilder.html</a>	Codedom code generation sample.
<a href="#">\net\getresponse\getresponse.html</a>	<b>System.Net</b> sample using the <b>WebRequest</b> class.
<a href="#">\net\udpchat\udpchat.html</a>	<b>UdpClient</b> net sample.
<a href="#">\reflection\emit\reflectionemit.html</a>	Reflection sample using emit to generate an assembly.
<a href="#">\reflection\invoke\reflectioninvoke.html</a>	Reflection sample showing invoke functionality.
<a href="#">\regexexpressions\regexexpressions.html</a>	Regular expression ( <b>Regex</b> class) sample.
<a href="#">\remoting\remoting.html</a>	Remoting sample with client and server.
<a href="#">\resources\managedresources.html</a>	Managed resource sample.
<a href="#">\security\permissions\permissions.html</a>	Code access security sample.
<a href="#">\serialization\serializable\serializable.html</a>	Serialization sample showing the <b>ISerializable</b> interface.
<a href="#">\serialization\simpleserialize\simpleserialize.html</a>	Simple serialization sample.
<a href="#">\xml\xmlschema\xmlschema.html</a>	XML schema object model sample.
<a href="#">\xml\xmltransform\xmltransform.html</a>	XML transformation sample.
<a href="#">\xmlserialization\xmlserialization.html</a>	XML serialization sample.

pigui Directory

<a href="#">\hello\hello.html</a>	Simple hello world sample using Tk.
<a href="#">\pigpad\pigpad.html</a>	More advanced Tk sample.
<a href="#">\tk\tk_wrapper.html</a>	Simple Tk wrapper classes.

utilities Directory

<a href="#">\cleanbuild\cleanbuild.html</a>	SSCLI build cleanup utility.
<a href="#">\codetohtml\codetohtml.html</a>	JScript tool to format code to HTML.
<a href="#">\corclass\corclass.html</a>	Assembly and class searching utility.
<a href="#">\crlf\crlf.html</a>	Line termination analysis utility.
<a href="#">\dnprofiler\dnprofiler.html</a>	Profiler example.
<a href="#">\getcliversion\getcliversion.html</a>	Runtime version value utility.
<a href="#">\grep\grep.html</a>	Grep utility.
<a href="#">\keyconfig\keyconfig.html</a>	SSCLI assembly key configuration tool.
<a href="#">\typefinder\typefinder.html</a>	Type searching utility.
<a href="#">\wordcount\wordcount.html</a>	Wordcount sample utility.
<a href="#">\xsd\xsd.html</a>	XSD schema conversion tool.
